

Publishing and Secure Print

Delivery of information is the key element for all users, the goal being to eliminate printed output. At the publishing stage, our software solution seamlessly delivers the right format to your end user. Whether it merges data into an electronic form, creates a PDF, faxes, e-mails, prints or archives, our software solution does it all. Hospitals create vast amounts of paper such as financial, census and management reports. Our Medirex software solution eliminates these stacks of paper by parsing and splitting these reports and then delivering them as PDF's to your medical users.
